

The sword *Frostbite* is an awe-inspiring weapon with a blade that seems to shimmer between states of existence. Its core is crafted from an eerie, deep black void that draws in the surrounding light, almost as though it's absorbing the essence of the world around it. Etched along the center of the blade is a swirling pattern of deep blues and silvers, representing the fusion of void, water, and ice magic. These etchings pulse faintly, moving like a frozen river with glimpses of stars within it, giving the impression that it holds the cold depths of space itself.

The edges of the blade appear razor-thin and are covered in a sharp, crystalline frost that glows faintly, exuding a bitter, icy chill. Touching it, even indirectly, might freeze flesh instantly. The sword's guard resembles breaking waves frozen in time, jagged yet elegant, curving outwards to protect the wielder's hand. Small, ethereal wisps of mist drift from the guard, creating the illusion that the sword is partially ethereal.

The handle is wrapped in dark blue leather that is both warm to the touch and unyielding, inscribed with runes that amplify its arcane powers. The pommel is shaped like a small black pearl encased in ice, representing the essence of void magic held in the balance with water and ice, swirling slightly as if alive.

When swung, *Frostbite* leaves a faint afterimage of a starry night sky behind it, and the air seems to ripple as it distorts time and space, hinting at its reality-bending powers.
